Residential electricity rates average around 12-15 cents per kWh in the US. So 1 MW used for an hour (1 MWh) would be worth \$120-150 at residential rates.. For large utilities and commercial accounts, rates drop down to an average of about 10 cents per kWh, so \$100 per MWh or 1 MW for one hour.. Actual wholesale electricity prices vary a lot by region and over time.

Megapack stores energy for the grid reliably and safely, eliminating the need for gas peaker plants and helping to avoid outages. Each unit can store over 3.9 MWh of energy--that"s enough energy to power an average of 3,600 homes for one hour.
