

American energy storage battery company vizn

Is ViZn Energy safe?

ViZn Energy systems run on a safe chemistry that is non-toxic, non-flammable, and non-explosive. The electrolytes used in the ViZn system are food grade and found in abundance at commodity prices. Counter to nearly every commercially available energy storage solution, ViZn Energy has this safe feature. ViZn Energy has 5 employees across 2 locations and \$63.89 m in total funding.

What is ViZn Energy?

ViZn Energy is a company that offers a safe, reliable, and cost-effective energy storage solution. Their battery achieves unique performance through the use of a hybrid flow battery in which alkaline electrochemical components are dissolved in the electrolyte.

Is weview partnering with vizn energy systems?

The company appears to be directly continuing the work of the original developer of the technology, US group ViZn Energy Systems. In 2019, WeView partnered with ViZn, which had developed the zinc-iron flow battery technology, as reported by Energy-Storage.news at the time.

Does vizn still have a website?

ViZn still has a website but it has not been updated since 2016. WeView, founded in 2018, describes itself as a company focusing on grid-level energy storage technology targeting system integrators, new power plants, power grids and commercial and industrial (C&I) users with the 'world's leading zinc-iron flow battery technology'.

Did weview buy vizn?

Bonner was succeeded shortly after that by John Lowell, who secured the deal with WeView. His LinkedIn profile says he stayed at the company until August this year, and appears to reveal that a Chinese company, presumably WeView, acquired a majority stake in ViZn in 2020.
