the first installation where ANDRITZ integrated its technology for fuel and ash handling with its biofuel boiler. Work was recently completed and performance tests have been run on a new combined heat and power (CHP) plant in the city of P&#228;rnu, Estonia. P&#228;rnu, with its population of about 44,000, is Estonia's

ANDRITZ PowerFluid boilers are based on Circulating Fluidized Bed (CFB) technology to produce steam and electricity from nearly all solid fuels such as biomass, coal, sludge, RDF, to alternative fuels and waste streams. PowerFluid boilers employ modern multi-fuel combustion technology to efficiently produce power while keeping emissions within environmentally safe limits and ...
