Our buildings are not performing as designed, typically having a much greater energy consumption. Achieving Net Zero therefore starts by closing the energy performance gap of our buildings. Indeed, the Greater London Authority's (GLA) "Be Seen" initiative requires building owners to explain their energy performance gaps.

The International Energy Agency (IEA) estimates that renewable energy will need to account for at least 65% of global electricity generation by 2030. As well as this, the Paris Agreement dictates that zero-carbon solutions could be competitive in sectors representing more than 70% of global emissions no later than 2030. With this in mind, we showcase some of the ...

Energy prices saw an unprecedented rise in the last few years, reaching their peak at the end of the summer of 2022. Fortunately, the situation for wholesalers has changed and prices have now fallen. This makes the first quarter of 2024 the ideal time to ...
