

Anwei power outage on August 7

Why is China facing a power outage?

China has been facing record-breaking temperatures since early July. This, along with low rainfall, has resulted in severe drought conditions and widespread power outages. In recent weeks, power outages sparked concerns over a repeat of last year's electricity crunch during the pandemic which hurt the manufacturing hubs.

Does Sichuan have a power shortage?

Sichuan - a region that was mostly spared from nationwide power cuts in 2021 due to a lack of coal - has been bearing the brunt of the country's power shortage this year amid severe heatwaves that have depleted the Yangtze River basin.

Why is there a large power supply gap in Dazhou?

"Since August 7, due to multiple factors such as the extreme high temperatures and tight power supplies in the whole province, there has been a large power-supply gap in the local power grid of the main urban area of Dazhou," the Tuesday notice said.

Why was my power cut on 22 Jul 2023?

A fault has occurred on a piece of UK Power Networks' electrical equipment, causing a power cut on 22 Jul 2023. An underground electricity cable on the high voltage network has faulted, resulting in an area-wide power outage. Estimated time for power to be back on: 10:00 to 11:00.

Why did Sichuan lose power in 2021?

Additional reporting by Zhao Ziwen Sichuan was mostly spared from nationwide power cuts in 2021 that resulted from a lack of coal, but now droughts are crippling the hydroelectric power supply that the province depends on.

Why did I experience a power cut in my area?

A fault occurred on a piece of our electrical equipment which controls the power to your area. We had to turn off the power so our engineers could safely carry out emergency repairs.

Report a power outage to Puget Sound Energy or see where the power is out. You can use the PSE outage map to see current outages, as well as restoration times. Restoration times are estimates. During a major storm, it can take 24 hours or longer to provide updated information on power restoration.

Outage map guide Tips The outage map is updated every five minutes, providing a snapshot of service interruptions in TEP's service area. A red box represents the approximate area of an outage. Because outages affect distribution circuits that do not neatly conform to geographic areas, some or even most of the addresses displayed within the

4 ???· EPE's Outage Map is available 24 hours a day, 7 days a week to see if an outage has been reported in your area. The Outage Map now features an Estimated Time of Restoration, or ETR, to offer you an approximate time for when your power will be restored. If needed, the ETR will be updated throughout the restoration process.

Most outages will be shown on the map. Please be sure to always report your outage to our Trouble Line at Maui: (808) 871-7777, Molokai and Lanai: 1-877-871-8461 (toll free) so your specific location is provided to our crew. Heavy call volume to our trouble line may result in some calls not getting through.

Open Map. Our interactive map is updated every 5 minutes and provides regional power restoration information. You may also choose the outages by county option to see a list of estimated time of restorations, or ETRs, in your county. If you click on the arrow to the left of your county's name, you will see ETRs for the towns and villages within that county.
