Expanding energy ties. Azerbaijan (population 10.3 million), which is the host of this year's global climate summit COP29, is the epitome of a country experiencing carbon lock-in. Oil and gas production contributes roughly half of the South Caucasus republic's GDP and half of all its national budget revenues, as well as more than 90 percent of its export earnings.

Azerbaijan's economy has long been centered on its hydrocarbon sector. The world's first industrial oil well was drilled in 1847 at Bibi-Heybat on the outskirts of Baku; by the turn of the twentieth century, Azerbaijan was producing over half of the world's oil the Soviet period, Baku continued to be a major supplier of oil--though production declined in later years.
