How much money will balcony solar panels save you? One 400 W plug-in balcony solar panel could save you around \$80 a year on electricity bills. This is considerably less than the \$483 a year that a 3.5 kilowatt (kW) roof-mounted solar panel system could save you. But then again, you can fit far fewer panels on a balcony than on a roof.

Components of a Balcony Solar System. A successful balcony solar PV system comprises four essential components: 1. Solar Panels: These panels capture sunlight and convert it into direct current (DC) energy, which can be further converted into usable alternating current (AC) electricity. Some systems include battery storage for surplus energy. 2.
