The Vietnamese primary cell and battery market was finally on the rise to reach \$144M in 2023, after two years of decline. Over the period under review, consumption, however, showed a abrupt downturn. Over the period under review, the market hit record highs at \$682M in 2012; however, from 2013 to 2023, consumption remained at a lower figure.

Vietnam has an abundance of high-quality nickel reserves that, in recent years, have become increasingly attractive to international mining companies. The electric vehicle explosion has engendered soaring demand for raw materials, such as nickel, which is a key component in the lithium-ion batteries that power electric motors. Now, with the combined plans of Australian ...
