

# Cambodia sun power energy solutions

Does Cambodia have solar power?

However, considering the country's historical energy mix, the existing solar capacity appears positive. As of 2011, Cambodia had no solar power plants, and solar energy was not a part of the country's energy mix. Cambodia's current installed solar capacity is slightly over 400 MW, but the country is targeting 3.1 GW by 2040.

What are Cambodia's goals for solar energy?

With these opportunities in mind, the government has set ambitious targets for expanding solar energy in Cambodia, aiming to inject 2 GW of solar energy into the grid by 2030. This goal is supported by a range of policies designed to facilitate the growth of the solar sector, including incentives for investment and development.

Is solar energy a good investment in Cambodia?

Already, there is growing awareness about solar energy in Cambodia, providing an excellent investment opportunity--while also the cheapest way for Cambodia's EDC to buy electricity. Solar power purchase agreements in the region reached a low of USD 0.0387/kWh.

Will Cambodia get more solar power by 2023?

Even though renewables now make up most of Cambodia's energy, bigger ambitions are ahead. An additional 495 megawatts (MW) of electricity generation from seven solar power plants will be online by 2023. This will boost solar power's share to 20% of installed power capacity.

How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.

Is Cambodia a solar power hotspot?

Cambodia's geographical location and climate conditions position it as a solar power hotspot with potential that surpasses many of its regional neighbours. Studies show that the country receives a daily solar irradiance of 5 kWh per square m and an average of eight hours of sunlight daily.

Advanced Power Energy Solutions (APES) was established in 2011. The company's core business is providing consultancy, services, solutions and material for construction and development projects from design to supply to installation; as well as high-end electrical equipment to the key consumer, commercial and industrial sectors in Cambodia.

Solar power is a promising solution for Cambodia's energy needs, given its potential for developing
