

Will Cameroon achieve a universal access to electricity by 2035?

In addition, this paper introduces the energy roadmap to achieve a universal access to electricity, which will pave the way for the country emergence by 2035. It is found that energy sector of Cameroon holds promising possibilities of development and diversification given the country's energy potential.

Can renewables solve energy problems in Cameroon?

Electricity needs are expected to continue rising over the next decade to reach 5000 MW by 2020 and 6000 MW by 2030. This paper seeks to address energy issues (reliability, accessibility and security) in Cameroon and brings to light the potential and meaningful contributions of renewables in solving energy concern.

How is electricity distributed in Cameroon?

Cameroon electricity distribution is carried out in three separate supply networks or grid systems, each grid responsible for meeting its full demand requirement. These grids are: the northern interconnected grid (NIG), the southern interconnected grid (SIG) and the eastern isolated grid.

How much energy does Cameroon use?

With respect to sources of origin, 71.8% of energy consumption in 2014 came from biomass (Fig. 2 c). Hydropower dominates electricity generation in Cameroon with 69%, followed by self-production 22%, with an installed capacity of 1558 MW in 2009.

Who regulates electricity in Cameroon?

The Rural Electrification Agency (AER) is responsible for promoting and implementing rural electrification programs in Cameroon. It also manages the Rural Energy Fund (FER). The Electricity Sector Regulatory Agency (ARSEL) is responsible for regulating the electricity sector as well as setting electricity rates and determining electrical standards.

What is the hydroelectric potential of Cameroon?

Hydroelectric theoretical generation potential of Cameroon is estimated at 297 TWh with only 13,700 MW currently implemented due to numerous environmental obstacles. Water variations induce regular and frequent power shortages throughout the country. The hydroelectric potential of Cameroon as of 2006 is illustrated in Table 5.

AMDC Energy is a trading name of AMDC Energy a limited company registered in England and Wales under number 10352741. Its registered office is at 35 Ballards Lane, London N3 1XW, where a list of directors is available for inspection. Accessing our site
