Según KAIZEN(TM) Energy, es necesario tener no sólo la cantidad, sino también la calidad adecuada de energía. Adoptar comportamientos que generen emociones positivas, como expresar gratitud o iniciar interacciones con un comentario ...

The circular economy has gained significant prominence in recent years as an essential response to the environmental, social, and economic challenges the world is facing. Based on the linear consumption of "extract, produce, use, and discard," the traditional model is no longer sustainable in the face of resource depletion, climate change, and the growing generation of residual waste.
