Toulouse - Monday, October 2, 2023 - Safran Electrical & Power today completed the acquisition of Thales' aeronautical electrical systems business, which covers electric conversion, power generation, and motors for civil and military aircraft. Safran Electrical & Power's growing expertise, particularly in conversion, strengthens its position as a leader in the entire aircraft electrical chain.

A leader in electrical protection components Safran Electrical Components is the subsidiary of Safran Electrical & Power specializing in electrical components. It is also the world leader in harsh environment harnesses for landing gear and U.S. military applications.

Smarter electrical solutions for a better flight Safran Electrical & Power is one of the world's leaders in aircraft electrical systems. It is a key player in the equipment electrification & in the electric and hybrid

Comoros solar safran electrical power

propulsion sector. Mastering the on-board energy system, the company designs and provides modular, innovative and optimized architectures and solutions.

The Government of Comoros wants to improve the supply and storage of solar on its islands and is inviting applications for the development, operation and maintenance of multiple PV plants with...

[? Press release] Safran launches solar energy production at its France sites to reduce their carbon footprint Safran, working with RESERVOIR SUN and IDEX will generate part of the energy it ...

But the electricity mix - the balance of sources of electricity in the supply - is becoming increasingly important as countries try to shift away from fossil fuels towards low-carbon sources of electricity (nuclear or renewables including hydropower, solar and wind). These interactive charts show the electricity mix of the country.

Electrical hybridization of aircraft and propulsion systems is a key pillar of Safran's decarbonization strategy.. That's why Safran Electrical & Power has developed a very high power density motor-generator - GENeUSTM 300 - which is intended to hybridize the propulsion systems of the future. At the end of its first test campaign, this equipment ...

Safran Electrical & Power is one of the world's leaders in aircraft electrical systems. The company is a key player in equipment electrification and in the electric and hybrid propulsion sector. It has 13,000 employees across 13 different countries. For more information, visit:

In addition, Safran Electrical & Power has approved a network of repair centers to support its MRO activities globally to ensure flexibility availability & service continuity. As the Original Equipment Manufacturer, Safran Electrical & Power has the expertise to provide the highest level of quality and best in class Turn Around Time.
