

Congo Republic cost of solar panels for 4 bedroom house

Could solar power change energy consumption in Congo?

Solar power could change energy consumption in Congo. - The Loudima family in Congo have long been without electricity but they have found an environmental solution: solar power. In the remote districts of Pointe Noire, the Congolese start-up Hélios Électricité has installed a solar power plant.

How much solar power is available in Kinshasa?

In the area around Kinshasa there is a further 6 gW of solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa, Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

How much power does DRC need?

Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing offgrid power or 16 gW of installed solar capacity ! Same applies to clean water as only 23% have access.

Why is the electrification rate so low in Congo?

According to the World Bank, nearly half of the Congolese population does not have access to electricity. Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure.

Will the DRC benefit from the Inga?

Currently the DRC only has 2.5 gW installed and no early benefit from the Inga. However solar and wind is available now. Existing HEP could fill in the 'gaps' when solar is not available. However offgrid power is essential in the rural areas and small towns across this vast country.

How much does solar power cost?

Solar power could be the miracle solution to trigger the energy transition, pumping fresh water and supplying low-income households with basic needs. But the panels cost a small fortune, ranging between 500 and 6,000 euros.
