Where is Corre energy & semperpower delivering a massive battery storage facility?

From pv magazine ESS News site Dutch renewables developers Corre Energy and SemperPower have come together to deliver a massive battery storage facility, which will be collocated with Corre's compressed air energy storage (CAES) project in Zuidwending, in the province of Groningen, the Netherlands.

Will Corre energy build a big battery?

Namely, the big battery will share the same grid infrastructure as Corre Energy's planned ZW1 CAES project. The developer aims to use salt caverns at the site to build a 320 MW CAES facility with a maximum storage discharge duration of approximately 3.5 days and a target commencement date around the end of 2026.

What is Corre energy & Eurowind energy a/s & gas storage Denmark?

The project brings together Corre Energy, Eurowind Energy A/S and Gas Storage Denmark, combining expertise to balance renewables with 100% green power. The location of the project ensures proven salt resources and infrastructure and excellent connections to grid, gas and hydrogen supply.

Who is iStock Corre energy?

Photograph: iStock Corre Energy, the embattled Dublin-listed renewable energy storage developer, has raised EUR4 million from the sale of its 50 per cent stake in a Dutch battery joint venture development set up less than six months ago. The funds will help tide the company over as it seeks to secure a deal with a big external investor.

Does Corre energy have a pipeline?

Corre Energy's roadmap includes several potential projects in the pipeline, initially with two in the Netherlands and two in Denmark. Corre Energy has further underground energy storage projects located across the globe.

When did Corre Energy last close a funding round?

Corre Energy last closed a funding round on Feb 23, 2023 from a Post-IPO Equity round. Other companies that may be considered competitors or alternatives to Corre Energy include Starfire Energy, K2 Energy, and Connected Energy.
