What is Modine L-CON BTMS?

The Modine L-CON BTMS addresses the unique thermal management needs of commercial EV batteries across a broad range of vehicles by being adaptable to fit into diverse chassis layouts.

What is a Modine battery thermal management system?

The Modine Battery Thermal Management System is a complete thermal system solution that maintains the critical operating temperature ranges of vehicle batteries. Design solutions are available for both active and passive cooling circuits. Standard packaging or customized solutions available. Modine field proven patented master controls system.

Is Modine a good thermal management company?

“As a US-based thermal management solutions manufacturer, Modine is ideally positioned to serve the needs of domestic off-highway machine and specialty vehicle makers as demand continues to grow,” said Gina Maria Bonini, Vice President and General Manager of Advanced Thermal Systems at Modine.

How many VDC does a Modine battery have?

LV: 12 or 24 VDC option. As you design the future of clean technology, Modine is ready to help with proven thermal systems engineered to quickly and seamlessly integrate into your design. Modine's Battery Thermal Management System is a complete thermal solution that maintains the critical operating temperature ranges of vehicle batteries.

What is a Modine EVantage system?

Leveraging more than a hundred years of thermal management experience, Modine EVantage systems, including the L-CON BTMS, are designed, manufactured, and tested for operation in harsh environments and ruggedized to operate reliably in high-vibration applications.

What is EVantage BTMS?

Combining state-of-the-art, proprietary Modine heat exchanger technology with tailored smart electronic products, the EVantage BTMS delivers a complete solution, designed to fit any chassis. With the included master thermal controller and Modine-developed firmware, our compact system is proven to deliver maximum cooling at the lowest power draw.

Heating: In cold ambient conditions, the battery pack may need to be heated to facilitate charging/pre-conditioning and getting the pack temperature to ideal range. The BTMS heating loop includes a high voltage ...

Modine introduced the EVantage Battery Thermal Management System (BTMS) and Electronics Cooling Package (ECP) products for use in all-electric commercial vehicles last year. These systems are currently

Heating: In cold ambient conditions, the battery pack may need to be heated to facilitate charging/pre-conditioning and getting the pack temperature to ideal range. The BTMS heating loop includes a high voltage (HV) electric heater to warm the coolant to the desired set point. **Passive Cooling:** The battery pack will generate heat during charging and when the ...

What is BTMS - 50 - This pastille-form 50% active Behenyl (C22) quaternary conditioning agent and cationic emulsifier stands out for its lack of ethoxylated components and volatile compounds. Sourced from colza oil extracted from the turnip rape plant (*brassica rapa subsp. oleifera*), it boasts organic credentials. Compared to conventional HH BTMS, this ...

To overcome these challenges, Modine has developed an innovative solution - Battery Thermal Management System with a Liquid-Cooled Condenser (L-CON BTMS). This advanced system efficiently regulates the temperature of battery packs, even in tight spaces within the vehicle and harsh operating environments.

With the new EVantage BTMS and ECP, Modine provides a complete thermal solution to its commercial, specialty, and purpose-built EV customers, allowing their customers to focus their own engineering resources on other value-add activities.
