Pumped storage hydro (PSH) is a large-scale method of storing energy that can be converted into hydroelectric power. The long-duration storage technology has been used for more than half a century to balance demand on Great Britain's electricity grid and accounts for more than 99% of bulk energy storage capacity worldwide.

Drax Group plc, trading as Drax, is a power generation business. The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business. The company is listed on the London Stock Exchange and is a constituent of the FTSE 250 Index

About Drax: Drax Group's (Drax) purpose is to enable a zero carbon, lower cost energy future and in 2019 announced a world-leading ambition to be carbon negative by 2030, using bioenergy with carbon capture and storage (BECCS) technology.

Drax's plans can help the next Government deliver UK energy security The UK has decarbonised its energy system at a quicker rate than any other country, but having done "the easy bit" and with demand for electricity forecast to increase by 50% by 2035, we are now at an inflection point.

At Drax Energy Solutions we supply renewable source electricity to customers who agree renewable energy contracts with us. These are backed by Renewable Energy Certificates. ...
