Date: May 2, 2017 PITTSBURGH, PA -- Power management company Eaton today announced it has expanded the range of capabilities in its Power Systems Experience Center (PSEC), a full-scale training, testing and demonstration facility near Pittsburgh. The 21,000-square foot facility in Warrendale, Pennsylvania, now includes a complete microgrid solution, which powers the ...

William Murch is the director of services for Eaton's microgrid energy systems business. Murch leads Eaton's microgrid energy system solutions and has more than thirty years of experience in electrical systems. He has worked with customers across commercial, industrial and utility applications to solve complex power management challenges.

3:01. Keep power flowing through microgrids despite power disruptions from natural disasters, accidental faults or intentional attacks. Learn about disaster restoration, reliability and energy savings with the Eaton Power Systems Experience Center (PSEC).

Eaton's mission is to improve the quality of life and the environment through the use of power management technologies and services. We provide sustainable solutions that help our customers effectively manage electrical, hydraulic and mechanical power - more safely, more efficiently and more reliably.

The Eaton Power Systems Experience Center (PSEC) explains microgrids and how the facility's full scale microgrid demo minimizes power disruptions, improves reliability, increases electrical efficiency and intelligently uses multiple sources of energy.

Eaton's Cooper Power series three-phase smart transformers transform more than just voltage, they are changing the face of asset control and management. Utilizing microprocessor-based control schemes the smart vacuum fault interrupter (VFI) transformer offers extensive monitoring options, transformer and loop sectionalizing, fault event recording, zone interlocking, ...

The microgrid system installed at the Wadeville facility uses solar panels and Eaton's energy storage system with second life electric vehicle batteries to increase resilience, provide higher levels of energy independence, support grid stability and reduce energy costs. A similar sized microgrid could provide energy for 230 community homes.

Het microgrid in Wadeville betreft de eerste inzet van het energieopslagsysteem van Eaton in Afrika. Het maakt gebruik van gebruikte elektrische voertuigaccu's die de veerkracht verhogen, een hogere mate van energieonafhankelijkheid bieden, de stabiliteit van het net ondersteunen en de energiekosten met maximaal 40 procent te verlagen.
