How to store PCB board after PCBA test?

However, for the PCB board of the OSP process, need moisture-proof box to store, the temperature and humidity requirements are more strict, and the soldering is completed within 24 hours as much as possible, otherwise the pad is easily oxidized. 2. Storage after PCBA test is completed

What is the ambient temperature and relative humidity of PCBA?

The ambient temperature is controlled between 22-28 °C; and the relative humidity is 30-60%. According to different surface processes, PCBA storage time also has an impact, as shown below: 1. Temperature: 22±4 °C; 2. Relative humidity: 30-60%; 3. Vacuum-packed with desiccant 1. Temperature: 22±4 °C; 2. Relative humidity: 30-60%; 3.

How long does a PCBA board last?

Vacuum-packed with desiccant In general, the PCBA board coated with conformal coating can extend the storage period by 3-9 months, but some PCBA boards are not suitable for conformal coating, it needs to be determined according to the actual situation of the product.

By focusing on these strategies, energy storage companies can implement cost-effective PCBA test connectivity solutions that not only meet stringent quality requirements but also enhance ...

Energy Storage PCBA, Energy Storage PCBA, OEM, SMT, DIP, Energy Storage PCBA, Energy Storage PCBA

Quality control is indispensable to ensure the quality of Energy Storage PCBA. Rigorous quality checks during production include visual inspection, functional testing, and reliability testing. ...

In the energy storage industry, ensuring the reliability and safety of PCBA (Printed Circuit Board Assembly) is paramount. During the testing phase, two common and significant challenges ...

We focus on providing customers with one-stop PCBA Customization Services, including PCB manufacturing, Electronic components sourcing, SMT, DIP, Enclosure assembly, Fast sample ...

The energy storage industry demands highly reliable and safe PCBA (Printed Circuit Board Assembly) solutions. When it comes to PCBA testing, finding cost-effective connectivity ...
