South Africa has abundant solar resources, making it a prime location for the development of solar energy projects. The country has set a target of generating 18 GW of renewable energy by 2030, with solar energy expected to make up a significant portion of this target. The government's Renewable Energy Independent

Power Producer Procurement ...

The South African coal sector has a significant impact on South Africa's socio-economic landscape. Interest groups favouring coal have been influential in policy-making processes, especially due to coal's dominant role within the energy sector. The energy sector is responsible for 80 % of South Africa's greenhouse gas (GHG) emissions (NPC, 2018).
