

Found Energy's aluminum-thermal power systems extract renewable energy from aluminum at double the energy density of diesel and at a competitive cost. Compact, modular, safe, and carbon-free, our technology makes industrial decarbonization practical.

The Fount Energy Platform connects buyers and sellers in the cleaner energy market, enabling companies to find for example LNG at competitive prices from quality suppliers. Using a straightforward form, the buyer prepares an inquiry, detailing all relevant information - fuel type, volume, the port of delivery, etc.

Charge by Fount EV drivers can use charge.fount.energy to find available chargers when the charger owner has set it as available. Scan QR-code ? Scan the QR code on the charger and start the charging process. Or start charging in charge.fount.energy. No extra apps needed.
