How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: [Why record numbers of homeowners in France are installing solar panels](#)

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

Should you install solar panels on your French property?

The installation of solar panels on your French property is a tempting proposition for many owners, but the rewards are long-term, and it is not without risk. Thermal or Photovoltaic Solar Panels? At the outset it is important to define the term 'solar panel' as there are two types of panels, which are frequently confused with one another.

What are the different types of solar panels in France?

The most common type of solar panel in France is the 'photovoltaic solar panel' or PV (Panneau solaire photovoltaïque). These are typically fixed to the roof of the home, and they operate by using photovoltaic cells to generate an electric current when hit by the sun's rays. Within the PV type of solar panel, there are three sub-types in France:

Are there grants for solar panels in France?

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeR&#233;nov' run by Anah, the housing renewal agency, but these are means-tested. [How much does it Cost to install Solar Panels in France?](#)

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 6,400Wc (watt cr&#234;te, or 6.4 kWc), which is about 1.5x the power consumption of an average household in France.

Inverters . As the backbone of SolarEdge Home, our inverters turn solar energy into electricity that a house can use. Our DC-optimized inverters, enabled with Power Optimizers, maximize power generation by individually managing each solar panel, improving system efficiency and reducing power loss due to shading or mismatch.

Solar energy. Over the last few years solar energy has unsurprisingly become more popular in France. Solar heating systems heat water which is distributed via radiators through your home. Although installing solar panels costs at least EUR1,000 per square metre, this will amount to over EUR15,000 for a full installation so it is a big outlay.

Key components of a typical balcony solar system include: 1. Solar Panels: Usually one or two panels, each generating between 300-400 watts of power. 2. Microinverter: Converts the DC power from the solar panels into AC power for home use. 3. Mounting System: Secures the panels to the balcony railing or floor. 4.

Residential systems (under 36 kW) added another 284 MW to the grid, while medium rooftops (36 to 100 kW) maintained stable growth with 90 MW of new capacity. These numbers show steady expansion across all solar market segments. Solar energy provided 8.91% of France's electricity in Q3 2024.
