Status of Turkmenistan as one of the leading energy power in the world was proven by the estimation of reserves and resources of natural gas at Galkynysh deposit, which is the second biggest in the world. It has also been proven by independent British company Gaffney, Cline & Associates.

As is known, Turkmenistan offers enormous potential for using its energy resources in the interests of all, voicing a vision of sustainable goals and opportunities to achieve them. Support and stimulation of strategic initiatives in the energy sector are the basis for the implementation of large energy projects in the future.

Turkmenistan actively participates in international initiatives to ensure global energy security by proposing the creation of international legal instruments for regulating energy resource transit. In cooperation with the UN, the country promotes projects for developing low-carbon energy, including hydrogen energy.
