How much does energy cost in Guadeloupe?

Energy Snapshot Guadeloupe This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe's utility rates are approximately \$0.18 U.S. dollars (USD) per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33 USD/kWh.

Where can I find information about Guadeloupe energy?

Welcome to the website of Guadeloupe Energie! On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the latest news and events--all in one place.

How can Guadeloupe achieve energy independence?

"Achieving energy independence in Guadeloupe by shifting from fossil fuels to renewable energy sources is a challenge that we must take up for the benefit of future generations. With clear objectives and applying the means for success, the Multi-Year Energy Program (PPE) exemplifies our political resolve to reach our goals."

Why is geothermal energy important in Guadeloupe?

Geothermal energy is especially attractive since Guadeloupe is an archipelago. Production can be fully controlled, unlike photovoltaics, for example, which depends on sunlight conditions. Production costs are about half those of fossil fuel power plants and are not vulnerable to fluctuations in the world market.

When did geothermal power start in Guadeloupe?

Geothermal-powered electricity production began in 1996, with total production increasing to 15 MW once Bouillante 2 was brought on line in 2003. Electricity generated here accounts for 5% total generation in Guadeloupe.
