Those are for holding the enclosure to the solar panel. In early iterations I made a design change that made it impossible to get a wrench under the enclosure to hold the nuts. The carriages slide under the lip of the panel, underneath each hole. Then you can screw down the enclosure without needing a wrench to hold the nuts.

The RAK enclosure doesn't have straight walls, so if you drill a hole for an N connector the antenna is not straight. | Download free 3D printable STL models ... Sloped spacers to align an N mount on the RAK Wireless Wisblock solar enclosure. See screenshots for instructions. The one that goes inside is slightly different from the one that goes ...
