

Such is the case of the Energy Policy 2019-2050, which establishes guidelines and recommendations to develop the Terms of Reference for the next long-term power generation tenders, which will be issued beginning in 2025, when contracts such as Jaguar Energy, currently the primary electricity generation company in Guatemala, come to an end.

Guatemala: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
