

The Allspark's energy is neutral, neither good nor bad. The technology we have was reverse engineered from Megatron. The Allspark senses the evil and makes the new life forms evil because of it. If they had been reverse engineered out of Optimus, this would be a much different storyline. In fact...I think that could've worked better. Hmm.

Guyana is being positioned to be at the centre of important regional and even global conversations, with President Dr Irfaan Ali assuring that the country will play key roles in conversations on climate, food and energy security on multiple levels. On Saturday during the launching of a Histopathology Lab & 128 Slice CT Scanner at [...]

Guyana allspark energy

(O& M) contract will encompass a combined-cycle power plant featuring four Siemens Energy gas turbines and two waste heat recovery steam generators (HRSGs), which will generate 300 MW of power to be sold to Guyana Power and Light (GPL ...

Guyana has some of the highest electricity rates in the Americas and is about 97% dependent on imported fossil fuels. Using natural gas as a bridge away from heavy fuel oil, followed by the Amaila Falls Hydropower Project and an expansion of solar, wind and biomass, Guyana will see a massive expansion of renewable energy across the country.

The timeline for the delivery of first gas from Guyana's Gas-to-Energy project hinges on the outcome of the ongoing arbitration process between the government of Guyana and CH4-Lindsayca. Vice President Dr. Bharrat Jagdeo confirmed this during his recent press conference. The dispute arose over cost overruns and delays linked to the ...

The Energy and Energy Statistics Division is responsible for the analysis of petroleum product imports in Guyana. Fuel Marking The Government of Guyana, through the Agency, contracted Biocode, a UK-based company, to offer ...

With a historical dependence on imported petroleum-based fuels as its primary source of energy, Guyana imported 4.9 million barrels of petroleum-based products in 2012 (the equivalent of 13,320 barrels per day), which represents 13.42% more than 2011. This consisted of diesel, fuel oil, gasoline, kerosene and liquefied petroleum gas (LPG). ...

The Government of Guyana is seeking a company to operate and maintain the 300 MW power plant to be used in the Gas-to-Energy project, set to be commissioned in 2025, alongside related auxiliary facilities. The power plant is expected to bolster the country's energy infrastructure and support the national electricity grid.

Energon is an incredibly potent fuel source and the lifeblood of the Transformer race, but few know of its greatest secret--enough energon, or even a sufficiently strong dose of its unique radiation can, under the correct conditions, instantly reformat ordinary objects into living Transformers, sometimes known as energon mutations or AllSpark mutations.

Guyana: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

For some, the upcoming Guyana Energy Conference & Supply Chain Expo (GEC& SCE) might seem like an event only for the "elite"--the suits and ties, the corporate personage. But whether you're crunching numbers, tilling the earth, laying blocks, installing pipes, or selling food from a mobile kitchen, the GEC& SCE truly has something for ...
