The Western Sahara conflict is now in the 35th year, with no sign of resolution. While the United Nations is ostensibly responsible for its resolution and defending the human rights, some states provide implicit support for Moroccan occupation of the territory, failing to support a referendum which might include the option of independence. The issue also ...

So plugged it in to shore power, it has 4 house batteries 6 volt I'm told all we're at 3 volts. Under its new project, BTR aims to achieve an annual production capacity of 60,000 tons of lithium-ion battery anode materials with the goal of enhancing service offerings to overseas customers.

Yes, your 4 6VDC batteries are wired in SERIES (to make 12 VDC batteries) and then PARALLEL to double their amps (still 12 VDC). You would hook an external battery charger to the terminals with the large-gauge wires (positive and negative) that go to your "house".

Morocco has claimed authority over Western Sahara since 1975, but the United Nations considers it a "non-self-governing territory." Morocco controls the most populous area along the Atlantic coastline, more than three-quarters of the territory; this area, which the Moroccan government calls the "Southern Provinces," is represented in that country's parliament.
