

Is Axpo a climate-friendly company?

In Italy, Spain, Portugal and Poland, Axpo has a total of around 400,000 deliver points for electricity and over 45,000 deliver points for gas directly, as well as through sales partners. The Axpo power mix with hydropower, nuclear energy and biomass is climate-friendly insofar as it hardly results in CO₂ emissions in Switzerland.

How many kWh does Axpo produce in Switzerland?

In Switzerland, Axpo has a production capacity of approx. 25 billion kWh and a power grid covering 2000 kilometres. [citation needed] The average time of a supply interruption per end consumer is low. In the Annual Report 2018-19, this was 0.25 min./a. for Axpo Grids and 21.6 min./a. for CKW.

Does Axpo have a nuclear safety policy?

Plant safety: With regard to the safety of nuclear facilities, the Axpo Sustainability Report 2018-2019 states: "Axpo is committed to complying with the international nuclear safety standards specified by the IAEA Safety Convention (International Atomic Energy Agency) and ratified by Switzerland.

Does Axpo have a good credit rating?

At the end of 2016, UBS downgraded Axpo's credit rating to "BBB+". Since then, Axpo's situation has stabilised thanks to significant cost reductions and higher electricity prices (see current credit ratings). The company has expanded in wind and solar energy since financial year 2014-15.
