

Jinko 355W photovoltaic panel

What is Jinko Solar?

Jinko is the world's largest Tier 1 solar panel manufacturer in the world. They have developed a reputation for creating high quality and high efficiency solar panels at a cost-effective price, making them suitable for any Australian installation.

What is Jinko Solar certified to withstand?

Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). High salt mist and ammonia resistance. ©2020 Jinko Solar Co., Ltd. All rights reserved. Specifications included in this datasheet are subject to change without notice.

How many manufacturing bases does Jinko Solar have?

Jinko Solar owns 14 globalized manufacturing bases. Jinko Solar actively shapes industry standards, contributes to international frameworks, and promotes diverse applications of photovoltaic technology. By accessing and using this page you agree to the Terms and Conditions.

What is a 5 busbar solar cell?

A 5 busbar solar cell is a type of solar cell that adopts new technology to improve the efficiency of modules and offers a better aesthetic appearance, making it perfect for rooftop installation. This type of solar cell benefits from a half cell structure, which results in a higher module conversion efficiency (up to 20.42%), due to its low resistance characteristic.

The Jinko Tiger Neo N-type Solar Panel JKM435N-54HL4R-B has a 435W power rating and boasts a stylish all black design. Tiger Neo panels employ SMBB technology for better light trapping and improved reliability. The panels have an extremely durable design and offer excellent PID resistance for enhanced production and control.

What's the difference between a 60-cell and 72-cell solar panel? Popular for commercial and ground-mounted installations, 72-cell solar panels tend to cost less per watt and may reduce installation time by requiring fewer modules than 60-cell modules. 72-cell solar panels appear similar to 60-cell solar panels yet feature an extra 2 rows of solar cells added to the length of ...
