Those kaneka panels are not even ideal for 48v, because when they get hot their max power voltage will be below battery volts. I personally would get a Classic 200 and put the panels 2 in series if I had a 48v bank. That is what I did with my First solar thin films, they had similar specs to your Kanekas.

Kaneka GSA060, Solar Panel, 60 Watt, 48 Volt Detailed Description: Generates more power Kaneka's amorphous silicon PV module has superior light absorption. Compared to mono-crystalline silicon PV modules or poly-crystalline silicon PV modules, Kaneka's module generates considerably more power. Superior performance under high-temperatures

The adoption of solar panels in Kuwait represents a pivotal shift towards harnessing renewable energy sources, in line with the country's vision to reduce carbon emissions and diversify energy resources. With its abundant sunshine, Kuwait has immense potential for solar energy production, making it a significant market for solar panels, solar inverters, and related technologies.
