

Why is HDF Energy partnering with PT PLN Nusantara power (ex PJB)?

The collaboration between HDF Energy and PT PLN Nusantara Power (ex PJB) will allow to accelerate the development of these hydrogen projects. Mathieu Geze, President Director, PT HDF Energy Indonesia, declared: Indonesia is facing unique constraints due to its archipelago context.

Could a new multi-megawatt power plant solve Indonesia's energy crisis?

Many parts of the country depend on isolated grids powered by diesel fuel, especially in Eastern Indonesia (in the regions of East Nusa Tenggara, Papua and Maluku) where HDF Energy has a local presence. Renewable; multi-megawatt power plants, invented and developed by HDF Energy, could provide a solution to this problem.

How PLN will contribute to green hydrogen production in Indonesia?

After commencing the production of green hydrogen in Indonesia, PLN will work with HDF Energy to develop hydrogen-based power plants. Darmawan expressed the significance of Indonesia playing a major role in green hydrogen production through futuristic technological innovations.

What is Indonesia's National Hydrogen strategy?

The National Hydrogen Strategy underscores Indonesia's commitment to transitioning towards low carbon hydrogen, with a staged approach towards green hydrogen. MEMR is currently finalizing the country's Hydrogen Roadmap, which will define the timeline and key milestones for hydrogen deployment.

Why does Indonesia use hydrogen?

The use of hydrogen is completely consistent with the spirit of the Paris Agreement and is economically feasible to power initiatives intended to reduce the usage of fossil fuels. Additionally, it supports Indonesia's efforts to achieve carbon neutrality and is associated with its G20 chairmanship.
