I have a 5kW Sunsynk with 5kWh E-Tower Freedom won setup. Over the holidays the battery shut down when it reached 20%. Now I can not get the battery to start charging. I have done a reset on the battery and inverter, but the inverter says no battery, and no communication with the BMS Any recommendations on how to proceed Thanks

Batteries can be charged in a shorter time due to high charge capability; Included: 1 x Freedom Won e-Tower e5000 module; 1 x Module interface pedestal included (no cabinet required) 1 x 1.8m red 35mm battery cable with m6 lug; 1x 1.8m black 35mm battery cable with m6 lug; 2 x busbar connectors (x1 heatshrink in black

Kyrgyzstan e tower battery

and x1 heatshrink in red)

Battery tower of Kufstein Fortress. A battery tower was a defensive tower built into the outermost defences of many castles, usually in the 16th century or later, after the advent of firearms its name is derived from the word battery, a group of several cannon.. These, usually round, towers could house numerous cannon oriented in various directions and on several levels and their ...
