

Legion energy Tunisia

What is the energy transition in Tunisia?

The energy transition in Tunisia is being promoted by international actors, some of whom are connected to previous projects that have aimed to develop renewable energy in northern Africa for export to Europe.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

What percentage of Tunisia's electricity is generated from natural gas?

In 2020, natural gas made up 86% of Tunisia's installed capacity and 95% of power generation, while renewable energy made up 13% of installed capacity and 5% of power generation. Fossil fuels represent the majority of Tunisia's electricity generation mix (approximately 97%), with natural gas being the primary fuel source.

Does Tunisia have a high electrification rate?

Tunisia has achieved a high electrification rate, increasing from 21 per cent at the creation of the Tunisian Company of Electricity and Gas (STEG) in 1962 (six years after independence) to 99.8 per cent nowadays. However, the country's energy sector is currently facing several issues.

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company (CPC), a 471-MW combined-cycle power plant.

The legion is against reliance upon technology, which is why recruits are outfitted with a knife and told to fend for themselves. once a legionary has proven himself, he can keep armed with whatever weapon he can personally maintain and keep loaded. For veterans, this can be quite serious weaponry. It's also cheaper to keep a technologically inferior force supplied.
