

Electrochemical Magnetization Switching and Energy Storage in Manganese Oxide filled Carbon Nanotubes. Scientific Reports (IF3.8) Pub Date : 2017-Oct-19, DOI: 10.1038/s41598-017 ...

Electrochemical Magnetization Switching and Energy Storage in Manganese Oxide filled Carbon Nanotubes. Scientific Reports (IF 3.8) Pub Date : 2017-Oct-19, DOI: 10.1038/s41598-017 ...

Applying Capacitive Energy Storage for In Situ Manipulation of Magnetization in Ordered Mesoporous Perovskite-Type LSMO Thin Films ACS Applied Materials & Interfaces (IF8.3) ...

An energy storage system, water magnetization technology, applied in heat storage equipment, descaling and water softening, water/sludge/sewage treatment, etc., can solve problems such ...

Primary storage of energy in mammalian tissue is glycogen, a branched polysaccharide form of glucose. Glycogen serves a central role in glucose homeostasis and is crucial for proper ...

11 ????· The magnetization dynamics at every step of applied external field is solved using the Landau-Lifshitz- Gilbert equation: (1) where is the magnetization, γ is a gyromagnetic ratio, ...

Applying Capacitive Energy Storage for In Situ Manipulation of Magnetization in Ordered Mesoporous Perovskite-Type LSMO Thin Films ACS Applied Materials & Interfaces (IF 8.3) ...

Crystallographically textured zinc nucleation and planar electrodeposition for zinc metal batteries via magnetoelectric and magnetization effects Energy Storage Materials (IF 20.2) Pub Date : ...

The conversion reaction is further exploited for electrochemical energy storage. Our studies confirm that the theoretical reversible capacity of the Mn₃O₄ filling is fully accessible.
