

# Oneplus smart energy storage power supply

How much battery does a OnePlus pouch have?

The "Pouch" is co-designed by Sharge and OnePlus, which means the battery bank does more than most. It supports 40W USB-C charging for any USB-C PD device, more than enough for any smartphone, but steps up to 55W SuperVOOC when plugged into a OnePlus (or Oppo) smartphone. The battery capacity itself is 10,000 mAh.

Does OnePlus have a magnetic charger?

Wireless Charging--OnePlus has introduced the AIRVOOC 50W Magnetic Charger, a new wireless charging solution that attaches magnetically to the back of the phone (similar to MagSafe on iPhones). This accessory, sold separately for \$80, fully charges the phone in 65 minutes, making it the fastest wireless charging solution in the U.S.

Does the OnePlus 13 support 100W fast charging?

Keep in mind that while the OnePlus 13 supports 100W fast charging, it can only go up to 80W when used in countries like the United States. That's because of differences in power supply standards. The U.S. uses 110V sockets, which deliver 80W charging, while regions with 220V sockets, like the EU, can achieve the full 100W.

Does OnePlus 13 have a good battery life?

The OnePlus 13 has officially arrived, and it's already turning heads for its exceptional battery life and cutting-edge charging technology. With a massive 6,000mAh battery packed into an impressively slim 8.5mm body, the OnePlus 13 delivers outstanding performance, thanks to its innovative Silicon NanoStack technology.

Let's face it - the world's energy game is changing faster than a TikTok trend. At the heart of this transformation lies energy storage power supply systems like those developed by Benrong. ...
