

How much energy does Palestine need?

Palestinian energy demand increased rapidly, increasing by 6.4% annually between 1999 and 2005. Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually.

What is the main source of energy in Palestine?

Indeed, electricity is the main source of energy in the Palestinian energy mix, and for this source, the residential sector is the main consumer. Other energy sources have their own leading consumption sector. Diesel and gasoline are mainly consumed by the transport sector, LPG by the residential sector.

What is the future consumption of electricity in Palestine?

Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually. The Palestinian Electricity Transmission Company (PETL), formed in 2013, is currently the sole buyer of electricity in the areas under Palestinian Authority (PA) control.

Can Palestinians achieve 10 percent of electricity production from renewable sources?

The Palestinian Energy Authority issued a renewable energy strategy in 2012 that aims to gradually achieve 10 percent of electricity production from renewable sources by the end of 2020. According to the strategy, this goal can be achieved if certain prerequisites are attained.

Who supplies Palestinian electricity?

The Israel Electric Corporation (IEC) supplies most of the electricity in the Palestinian territories. PETL is the sole buyer of imported electricity for distribution in West Bank Areas A and B and in the Gaza Strip, which in turn supplies the electricity to the six Palestinian distribution companies.

Why is energy demand so high in the Palestinian territories?

Energy demand in the Palestinian territories is growing rapidly while the availability of natural resources is scarce, making the power sector almost entirely dependent on energy imports from neighboring countries.

The energy sector in Palestine faces significant challenges due to the geopolitical division of territories, cities, and communities. To achieve effective unification of electricity distribution, ...

The acceptance by Israel of a ceasefire arrangement on the war front with Hezbollah in Lebanon constitutes a strategic "bet". Israel will need to take a multifaceted approach to the arrangement that is based on enhancing defensive capabilities while, at the offensive level, committing to proactively preventing Hezbollah's re-entrenchment in southern Lebanon.
