Who financed the Papua New Guinea national energy access transformation project?

by adminNEA | Sep 28, 2023 | Uncategorized Papua New Guinea National Energy Access Transformation Project The Papua New Guinea National Energy Access Transformation Project (NEAT or the 'Project') will be financed by the World Bank and implemented by the National Energy Authority (NEA) and PNG Power Limited (PPL).

Will Marape privatize Papua New Guinea's energy and economic sectors?

At the 2024 Investment Conference in Sydney, Australia, Prime Minister James Marape unveiled a transformative decision set to impact Papua New Guinea's energy and economic sectors. Speaking before an audience of investors and industry leaders, Marape announced plans to partially privatize PNG Power, the country's national power authority.

What is Papua New Guinea's energy future?

"This project represents a major step forward for Papua New Guinea's energy future. It will not only expand access to reliable electricity but will also contribute to the country's climate goals by scaling-up renewable energy," said World Bank Group Country Manager for Papua New Guinea, Khwima Nthara.

Is Papua LNG a good investment?

Mr Marape said he understood that France's TotalEnergies, which leads Papua LNG, had made "good progress" through the redesign and re-bidding process with contractors to get the cost of the venture down. "The bottom line is, the project must be economical for all parties," he told The Australian Financial Review at PNG Investment Week in Sydney.

How much does Papua LNG cost?

The cost of Santos' proposed Papua LNG venture blew out by 50 per cent to \$US18 billion before it was paused earlier this year to rework the design, according to Papua New Guinea Prime Minister James Marape, who wants to see construction start by the end of 2025.

Will PNG Power be privatized?

The partial privatization of PNG Power aligns with broader efforts to modernize the country's infrastructure and address long-standing inefficiencies in public service delivery. This landmark move is expected to enhance energy accessibility, reduce operational burdens, and stimulate economic growth in the resource and energy sectors.
