A photovoltaic bracket is an essential component of the installation of solar panels. Its role is to support the solar panel and fix it in the correct position to capture solar energy to the maximum extent. Different materials and designs can be used for photovoltaic brackets depending on the installation site and requirements.

In some coastal areas, because of the frequent hurricanes, the strength requirements for photovoltaic brackets are very strict, which requires PV bracket manufacturers to be able to design a sufficiently strong solar bracket system. However, the increase in strength is always accompanied by an increase in cost.
