

A PV bracket system is typically constructed by a series of tilted, vertical and horizontal conductor branches as shown in Figure 1. During a lightning stroke, the lightning current will inject into the PV bracket system from the attachment point and be distributed on all the branches. To calculate the lightning current responses, the PV

The purlins are attached to the rails using various types of brackets, depending on the type of roofing material and the weight of the solar panels. Rail-Free Mounting Systems. Rail-free mounting systems do not use horizontal rails. Instead, the solar panels are attached directly to the purlins using special clamps or brackets.

PV support bracket made by NOVOTEK Roll Forming Machine is a solar mounting support cold roll formed steel Channel that used as solar panel support or constructions for structural purpose. The channel is formed from metal coil strips, and then roll formed by struct channel roll forming machine into an open channel section with lips to provide additional stiffness.

Accessing the purlins from below the roof. An alternative solution for problematic purlins, particularly concrete ones, is our bracket that securely clamps around the purlin rather than fixing directly into it. The bracket has 2 flat plates, 1 for the ...
