Hydropower is a key source of green energy for Croatia and will play a vital role in the country's goal to cut emissions by 45% before 2030. Despite the growing green energy capacity in Croatia, solar and wind adoption is lacking, leaving a gap in the market. In 2023 Croatia's PV capacity increased by almost 50%, from 224 MW to 305 MW.

Hive Energy and Ethical Power aim to develop a significant portfolio of power generating assets. The deal is also expected to further strengthen the companies' relationship. Ethical Power has already been appointed as EPC contractor for Hive Energy's projects, including the 13MW School Farm Solar Park and 44MW Woodington Solar Park in ...

Renewables developer Hive Energy plans to build its first solar power plants in Croatia, featuring three facilities with a combined capacity of 66 MW, in the Sisak-Moslavina and Bjelovar-Bilogora counties.. The local unit of the British firm has secured terrain on private lands and is now in the process of signing connection agreements. Two of the sites are expected to ...
