Photovoltaic flexible bracket is an emerging photovoltaic installation system, which is characterized by its flexibility and adaptability. Compared with traditional fixed photovoltaic brackets, flexible photovoltaic brackets can be flexibly adjusted according to terrain, lighting conditions, seasonal changes and other factors to maximize the power generation efficiency of ...

3. Clamps: A fixing element placed at the end of each guide is used to hold a photovoltaic module correctly. We can also find them intermediate to fix two panels together. 4. Guide joints and fixings: Component used to join various profiles together. When two guides meet, we use a union to make the structure of the solar panels more resistant.
