A solar electric system converts sunlight into electricity using solar cells. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity. An inverter changes DC power into alternating current (AC) to power your home or facility. Solar is a proven technology.

This facility produces high-quality, affordable solar panels using advanced crystalline photovoltaic technology. These panels, sold under the brand name "SAHAJ," are available in both mono and polycrystalline variants, ensuring efficiency and reliability for various solar projects. Sahaj Solar also excels in providing solar water pumping systems.
