

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

What is Serbia's energy supply in 2021?

Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%). Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable supply, respectively.

Where can I find total energy balance of the Republic of Serbia?

Total Energy Balance of the Republic of Serbia for chosen year is available [HERE](#). Construction of energy balances according to the old Eurostat concept can be realised on data which are in the database called Annual data - archive. The data were archived by the end of 2017 and will not be corrected in the future.

When will a new energy sector development strategy be adopted in Serbia?

up to 2050. Additionally, the Ministry of Mining and Energy of Serbia is expected to prepare a new Energy Sector Development Strategy of Republic of Serbia up to 2040 with the projections up to 2050, to be adopted by the National Assembly by the end

What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a EUR15 billion investment plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:

How many MW of electricity does Serbia have?

Installed capacity of hydro power is 2,835 MW and as of December 2019 wind power capacity is 500 MW. Serbia also makes use of geothermal and solar energy, currently 27% of Serbia's electricity comes from hydro while 4% comes from other renewables. Additional 600 MW of wind capacity is planned by 2030.

Hyundai Engineering has announced that it will sign a major contract with the Serbian Government later this month for the construction of a solar power plant with a capacity of 1 GW. This significant project, in collaboration with its US subsidiary and solar company UGT Renewables, was selected as the preferred bidder last November.
