Assuming your household can run on 2KW (not counting ACs etc), you need atleast 4KW Tata panels. Why 4? Because Tata panels offers around max 50% return which is the best available in india. Along with the solar inverter, solar battery, wiring etc, the total space needed for solar panels is 60sqft/KW panels.

We'll also assume that the manufacturer of these solar panels specifies an Open-Circuit Voltage (Voc) of 22.3 Volts for each solar panel. A good setup for these solar panels would be to wire them in a 4S2P configuration. This means that we would have 2 parallel strings, and each string would consist of 4 solar panels in series, resulting in ...

Flat roof solar panels boost efficiency and energy production in cities. They offer advantages like better design and sunlight optimization. Fenice Energy sees a flat roof as perfect for solar panels, allowing angle adjustments for more sunlight. This means solar panels can capture and convert more energy. Solar panel installation on flat roofs ...

The capacity of a solar panel, solar inverter and solar battery you'll need for a 3 BHK apartment depends on your electricity usage, location, and how much you want to rely on solar power.
