Solar power as a whole has been growing in popularity, and the applications of solar power systems seem somewhat endless. Between convenient portable and fully off-grid household systems, there are a number of considerations to take into account when deciding if a solar power bank is an appropriate purchase for you.

At first glance, a battery bank that costs \$7,200 is a much better deal than a battery bank that costs \$14,000 if both provide the same amount of power per day. However, it's important to look at lifespan and price per kWh (kilowatt hour). Let's say that each of the batteries above provides 12 kWh of useable energy per cycle (see section vi).
