

Can solar power be used in Somalia?

A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented. The research provides valuable information on the status of the utilization and potential of solar energy in Somalia and aligns with the NDP 9th.

Which companies invest in solar energy in Somalia?

Since 2015, the most significant investment in solar energy in Somalia has been produced by leading ESPs. The companies, which include BECO, NESCOM, and Sompower, have invested in the solar system project in different capacities, with BECO producing the most significant investment in the Somali energy sector.

Can Somalia harness solar energy?

This study explores Somalia's energy profile and the potential for harnessing solar energy. The installed photovoltaic capacity was found to be 41 MW and contributed 11.9% of the total electricity generation. A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented.

Is solar energy sound in Somalia?

The average yearly irradiation for 11 years of Somalia was obtained in terms of maximum radiation in Bari and minimum radiation in the Middle Juba region. Therefore, the data demonstrated that solar radiation is typically sound within Somali territory. Fig. 7. Diagram indicating the potential of solar energy based on the map of Somalia [51,59].

Can solar energy reduce energy costs in Somalia?

The simulation results using PVGIS revealed that the solar PV installation in Somalia produced two-fold the energy amount compared to PVs installed in Germany. Hence, RE, such as solar energy, can reduce electricity costs and the negative environmental impacts.

How much does energy cost in Somalia?

Depending on the region, the price can vary from \$0.30 per kWh to \$1.00 per kWh, starkly contrasting neighboring Ethiopia's price of \$0.06 per kWh. The scorching and consistent sunshine combined with ideal windy conditions means Somalia holds great renewable energy potential.

In many countries, including Somalia, excessive reliance on fossil fuels is a serious concern. Continually, the desire to get relatively cheap energy by mainly burning coal is stronger than the desire to maintain a good state of the environment [[22], [23], [24]]. The study aimed to assess the status of solar energy utilization in Somalia, one of the world's least ...
