

South 8 technologies Vatican City

SAN DIEGO, Aug. 16, 2023 - South 8 Technologies, Inc., the San Diego cleantech company innovating safer and higher performance electrolytes for the next generation of lithium-ion batteries, has closed a strategic investment with Lockheed Martin Ventures, the venture arm of Lockheed Martin (NYSE:LMT), a global leader in defense and aerospace technology, with ...

Abstract: A cap assembly is disclosed that creates a gas-tight seal with a cell can housing. The cap assembly has an outer surface, an inner surface and a perimeter edge. The cap assembly further includes an electrolyte injection port forming a port opening between the outer surface and the inner surface, a vent constructed to form a vent opening from the inner ...

Innovative collaboration with leading technology firms to advance military battery solutions PARK CITY, Utah, July 15, 2024 (Newswire) - Paleblue, renowned for creating the world's best USB rechargeable lithium batteries, has been selected by the Defense Innovation Unit (DIU) to prototype the first of the Operational Single Cell for Accessory Readiness ...

South 8 Technologies will develop high-power lithium-ion battery cells with the capacity to charge rapidly using a novel liquefied gas (LiGas) electrolyte technology. The LiGas electrolyte uses non-toxic and non-corrosive gases, which are already domestically manufactured and widely available, that are liquefied under moderate pressures and can be contained in ...

South 8 Technologies, Inc. develops, manufactures and licenses LiGas™, the liquefied gas electrolyte for advanced lithium-ion batteries that solves lithium-ion's "fire and ice(TM)" problems. South 8's patented LiGas electrolyte reduces fire ...

Explore the complexities of cybersecurity in Vatican City, the smallest independent state in the world. Learn about the legal framework governing cybersecurity, key security measures required, and challenges faced in implementing effective regulations. Discover how the Vatican integrates international best practices, prepares for future cyber threats, and ...

Unlike common battery electrolytes which are liquid at room temperature, or solid-state electrolytes under development, the team at South 8 Technologies is the first to develop and commercialize a novel, patented Liquefied Gas Electrolyte (LiGas™), for next-generation electrochemical energy storage devices. These non-toxic electrolytes use solvents that are ...

SAN DIEGO - South 8 Technologies, Inc. is thrilled to announce the closing of strategic investments from Shell Ventures and Taiyo Nippon Sanso Corporation (TNSC). This funding follows that of Shell's early-stage GameChanger program and several federal and state sponsored grant and contract opportunities that have helped mature South 8's breakthrough ...

VATICAN CITY (RNS) -- Visitors to Rome will have the opportunity to experience St. Peter's Basilica in a new way as part of an immersive exhibit, both in person and online, created through a ...

Porsche Ventures makes a strategic investment in South 8 and its liquefied gas electrolyte LiGas for high performance lithium-ion batteries SAN DIEGO (April 30, 2024) -(BUSINESS WIRE)-South 8 Technologies (South 8), a lithium-ion battery innovator, today announced Porsche Ventures, the venture capital arm of the sports car manufacturer, Porsche AG, as its newest ...

In this interview, Tom Stepien, CEO of South 8 Technologies, discusses how the company's innovative LiGas™ technology is advancing safer lithium-ion battery solutions and addressing challenges across defense, EV, and industrial applications. Can you introduce yourself and your role at South 8
