

Specialized photovoltaic bracket factory

What is a solar photovoltaic company?

The company is mainly engaged in solar photovoltaic system. Focusing on solar photovoltaic mounting research and development, design, production, sales, installation and testing and other one-stop services.

What is versol V-basic mounting system?

As a global leader in photovoltaic mounting structure product manufacturing and system solutions, Versol solar is committed to becoming a global leader of high-end equipment and intelligent services in new energy industry. Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range of models and styles, and is highly adaptable.

How many production bases does solar power company have?

The company operates three major production bases, encompassing nearly 50,000 square meters of production area. Its main business includes various photovoltaic fixed ground mounting structure, distributed mounting structure, tracking photovoltaic mounting structure, building mounting structure, and distributed power station development, etc.

Can a photovoltaic system be installed on a tiled roof?

It all happened when a friend asked him to help install a photovoltaic system on a tiled roof. Tiziano - with his well-known creativity, innovative spirit and long experience as a professional climber - immediately realised that the traditional way of mounting and fixing the solar panels was time-consuming and useless.

Its main business includes various photovoltaic fixed ground mounting structure, distributed mounting structure, tracking photovoltaic mounting structure, building mounting structure, and distributed power station development, etc. It is one of ...

As the world's leading manufacturer and solution provider of photovoltaic brackets and BIPV systems, Shilden has been deeply involved in a segment in the middle reaches of the photovoltaic industry chain - brackets for 14 years, firmly ...

Building photovoltaic brackets is an important foundation for solar power plants. To achieve a truly green ecological environment, we contribute to the construction of new energy power plants around the world. ...
