How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2024, the price of solar panels in the UK can vary depending on several factors.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500, whereas polycrystalline solar panels cost about £900 per kW.

How much does a solar panel installation cost?

Generally, two installers will work together to install your solar panel system, and depending on its complexity, they can take up to 3 days to complete the installation. This means that you can expect to spend anywhere between £600 and £3,000 on labour costs alone.

How do I compare solar panel prices & quotes?

Here you can compare solar panel prices and solar panel quotes with ease and find lowest cost panels. Simply type your postcode into the box below and select one or many local and national, trusted solar panel installers and ask them for a quotation.

How much does a solar system cost?

When you receive a quote for a solar system, it generally includes labour costs, but as a rough guide, the prices can range from £300-£500 per day per installer. The time taken to install a system typically depends on its size and the accessibility of the roof.

How much does it cost to clean solar panels?

However, if you notice your solar panels becoming dirty - for example, bird droppings, or dust building up on them during a dry, hot summer - you should consider getting them cleaned. Solar panel cleaning by a professional will cost around £100, but you can do it yourself with a hose. How much do solar batteries cost?
