

# Store electric system Estonia

Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:

How is the electricity market regulated in Estonia?

In Estonia, the electricity market is regulated by the Electricity Market Act and the Network Regulations, which contain requirements for electricity producers, sellers, network operators, line operators, balance managers, the organiser of the electricity exchange and consumers, as well as the Competition Authority, which supervises the market.

Is Estonia connected to the Western European electricity system?

Since the middle of the last decade, Estonia has become increasingly linked to the Western European electricity system. In 2006, the EstLink 1 direct current interconnection between Estonia and Finland was completed, making it the first interconnection for Estonia and the Baltic states with Scandinavia.

Does Estonia use oil shale for electricity?

Estonia joined the Nord Pool Spot market by 2012, securing its own price area within this regional electricity market. In 2018, oil shale constituted approximately 80% of Estonia's electricity consumption. By 2021, this figure had declined to 49%, reflecting a significant decrease in oil shale utilization for electricity generation.

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale-fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.
